Tardocillin 1200 – Storage Conditions

Dear Sir or Madame,

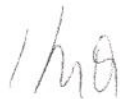

Tardocillin 1200 is a product, for which protective storage conditions of 2-8 °C are defined. These conditions apply for the whole shelf life.

In preparation of the marketing authorisation, stability tests were carried out at higher temperatures. Based on these tests we can ascertain, that a short time storage at higher temperatures is possible.

For practical reasons a short discontinuation of the cold storage is possible. However, in order to maintain the product quality, a moderate room temperature (21-25 °C) should not be exceeded. We advice our customers, that this discontinuation should not exceed 48 hours. For further storage, the product should be returned to 2-8 °C conditions.

We hope, that we could help you with the information given above. For further questions, don't hesitate to contact us.

Kind regards,

i. V. Dr. D. Hirsch
